**East Coast Britain speech - It is the influx from the Continent 16<sup>th</sup>-18<sup>th</sup> centuries - they had to learn English - you wished to say something beyond the plain facts with your limited vocabulary -so you dance the sounds adding body movements upon the spaces about you. They also use their first language to speak quickly - use of the range of the voice blends with the body movements ...**

**These matters are explained sometimes. In these new lands *where doth find refuge* , to say matters beyond the words -**

**with a philosophical meaning - a poetic one - a deep question -**

**you hang the words the thoughts as it were upon the mists- waters-seasons- dawn & dusk- **about the heimat****

I, of the SEAS peoples, hath had these matters explained before the 2<sup>nd</sup> World War- JEAN could dance it all ...
