**“ The curtains embroidered by Mrs Grote’s Greenland Eskimo relatives- her mother’s relatives- had been burned- they had embroidery of the history of Greenland- they were made for her wedding...The women were asked to go and see if her wedding dress was alright. The Solicitor had given orders to tell her there had been a fire- she **MUST NOT COME BACK-** until they had tidied the house & grounds-**

**Well she was anxious about her scarlet wedding frock-** her father had made in SPAIN for he wanted to see a scarlet bride against the snow- it was famous- it had been loaned for other weddings on their Island- **and it went to PARIS to be taken care of- she was asked to wear it at certain occasions- it was with a diamond collar & there were other jewels stitched on- these dresses were famous in Spain- Later it was decided by everyone THAT SHE MUST NEVER RETURN-** the damage could harm her health ! After the women had collected the dress & some other things- mercifully intact-.... then the three men came in by boat & locked up the house- put shutters on the windows-boarded up for winter...

**An un-prepossessing place outside people said but it was a vast wonder of scholarship-intelligence- normal household inside-**

Mr Grote's study remained-he had been killed on the island 1904-*it was not natural-*

Evil men of power were after their properties about the world-

she had been protected by the Island tenants after the disgraceful insults over the burial of her husband- THE EARLS WOULD NOT ALLOW HIS BODY TO BE RETURNED TO THE USA...

Finally the Islanders had told the nobles they would destroy their places if they touched the new grave- a great boulder was placed & the inscription put upon that- At first they had tried bury Mr Grote in a rat-infested part- then 2 gravestones had been broken to pieces- Mrs Grote was called Aunt Margaret I think it was-

by the tenants... When she was younger her son would come- her Greenland cousins- very beautiful women they would sing & sew sitting out in the fields... Then her nephew came to stay -others visited- She could not go & live on her island in Greenland without a family- she was waiting for her nephew to marry & have children- her brothers had been killed- & her sister-in-law  
*a Miss Frobisher she was*

the deaths were known to be unnatural-

Teresa Mary Butler/*Terry*....` It was because of the great wealth abroad- Some of the Islanders had gone to visit & joined the wonderful work ...around the world- She did not live on the Island all the year but had to visit her properties abroad-

it was hard for her after her husband was killed- he had circumnavigated every year & she could catch him where she would round the world- she had a house in New York but

she preferred to be where she could see her relatives- They had an ancient farm  
Montrose Scotland- & they would all get together up there- *I think it was an uncle ... So  
me of them had ships-*

1933 **SUMMER** ...A dog would not leave the place & the men had closed the shutters & nailed

dog pawing at the boards- **they too**  
**heard it-** the  
child had a purple halter round its neck- it was naked  
-  
the  
noble  
party had left the Island the previous day...

` The 3 men were in the boat with the other dog- going to leave- the home locked up by  
good Islanders in grief- they called dog but it would not come- a man got out of the boat  
& went to look-another followed- dog would not come away from where it was  
pawing...` *Witchcraft was to be the cry later-they they`d lock Margarethe Ransom Grote  
up in a lunatic asylum- they`d tried do it once before- Churchill stopped them- The Earls  
had tried lock her up after the Great War...but they`d been killing people for lands- he  
threw them out of the country to the Continent...*

1933 “ The child had been under the floorboards naked for 22 hours- a lead of purple satin was round its throat- the Island women had watched the party- throw the child far out in the SEA- ”

3 men of Faiths asked were cautious of nobles who came to the Island or lived sometime of the year upon it- Another report says that one of the religious men may have alerted the mainland-after three days -
